

Day 1: 16th June 2010, Wednesday
PERIPHERALLY INSERTED CENTRAL CATHETERS

UPDATED June 1, 2010

ELICIUM 2

09.00 - 09.15	Opening Session	Pamela Haylock (USA) chair
09.15 - 10.00	AVA - WoCoVA Keynote presentation	Sean Berenholtz (USA)
10.00 - 12.15	PICC indications and techniques	Josie Stone ((USA) chair
10.00 - 10.25	Accessing Vascular Access Needs	Lynn Hadaway (USA)
10.25 - 10.50	Ultrasound guidance as the standard of insertion	Ton van Boxtel (NL)
10.50 - 11.15	Advanced insertion techniques for PICC's	Nancy Moureau (USA)
11.15 - 11.40	Positioning the tip: EKG guidance and other methods	Mauro Pittiruti (IT)
11.40 - 12.05	PICC insertion: defining standards for training	Carmel Streater (GB)
12.05 - 12.15	Discussion	
14.15 - 17.10	PICC management and prevention of complication	Pamela Haylock (USA) chair
14.15 - 14.40	Current standards for dressing the exit site	Sharon Armes (CAN)
14.40 - 15.05	Occlusion: is it totally preventable?	Sheila Inwood (GB)
15.05 - 15.30	Venous thrombosis. a matter of size	Paul Blackburn (USA)
15.30 - 15.55	Potential clinical implications of infusion induced catheter movements in PICC's	Lynn Manly (USA)
15.55 - 16.20	PICC in the intra hospital setting	Lisa Dougherty (GB)
16.20 - 16.45	PICC in the Nutrition Unit and in the Oncology Unit	Maria Carmen Carrero (ES)
16.45 - 17.10	PICC in home care and in hospice	Hervé Rosay (FR)

D201-D202

10.00 - 12.00	Panel on logistic and legal aspects of PICC insertion	Ivano Migliorini (IT) chair
10.00 - 10.25	Overview on legal aspects in different Countries	Rita Celli (IT)
10.25 - 10.50	Nurse or physician: who is inserting?	Ivano Migliorini (IT)
10.50 - 11.15	Bedside vs. operating room vs radiologic theater	Dimitri Kalantzopoulos (GR)
11.15 - 11.40	Death by PICC: malpractice litigation	Sue Masoorli (USA)
11.40 - 12.00	Discussion	
12.30 - 14.00	Satellite symposium by ICU Medical (invitation only)	 ICU Medical, Inc.
	Needle-Free Connectors..., the inside story	Marcia Ryder (USA)
14.15 - 17.15	PICC 2010 worldwide: Abstracts Presentations	Lynn Hadaway (USA) chair
14.15 - 14.35	To oncology and beyond! How an ultrasound guided PICC insertion service has benefitted non-oncology patients in a UK hospital	Jackie Nicholson (GB)
14.35 - 14.55	Use of the Medical Catheter Tip Locator System to Determine Catheter Tip Location in 131 Patients	Gail Sansivero (USA)
14.55 - 15.15	Clinical management of PICC technique	Lijuan Wang (CN)
15.15 - 15.35	Evaluation of training in vascular access for nursing students	Maria Montealegre Sanz (ES)
15.35 - 15.55	Improving antibiotic treatment outcomes through the implementation of a midline: Piloting a change in practice for cystic fibrosis patients	Melita Cummings (AUS)
15.55 - 16.15	Bedside versus dedicated ambulatory for PICCs placement. 1000 cases analyzed.	Baudolino Mussa (IT)
16.15 - 16.35	From international guidelines to a shared clinical pathway: the IEO PICC team experience	Chiara Pari (IT)
16.35 - 16.55	Subcutaneous Securement in Peripherally Inserted Central Catheters: Results of a Prospective 50 Patient Trial with an Internal Securement Device	Gail Sansivero (USA)
16.55 - 17.15	The great anatomic misconception: the central venous catheter is in the axillary vein, not the subclavian vein	Jack LeDonne (USA)
17.30 - 19.30	Satellite symposium by Janssen Cilag (invitation only)	 JANSSEN-CILAG
	The burden of CRBSIs (catheter-related bloodstream infections) and strategies to reduce them	Philippe Eggimann (CH)
		Olivier Mimoz (FR)
		Jack LeDonne (USA)

D203

10.00 - 12.15	Controversies	Marguerite Stas (BE) chair
----------------------	----------------------	-----------------------------------

Day 1: 16th June 2010, Wednesday

10.00 - 10.50	Silicone or polyurethane ? The point of view of the engineer The point of view of the clinician	Kelly Christian (USA) Maria Carmen Carrero Cabellero (ES)
10.50 - 11.15	Reversed tapering or not ?	Michele di Giacomo (GB)
11.15 - 11.40	What is the current role of Midline catheters?	Andrew Jackson (GB)
11.40 - 12.05	Valved PICCs or non-valved PICCs ?	Jim Lacy (USA)
12.30 - 14.00	Satellite symposium by Vygon (invitation only) State of the art in Vascular Access:	VYCON Mauro Pittiruti (IT) Marianne Wekker (NL) Henry Huang (CN) chair
14.15 - 15.30	Workshop on experts' tips for preventing complications of PICCs Occlusion Thrombosis Infection Dislodgement	Nadine Nakazawa (USA) Marcia Ryder (USA) Walter Zingg (CH) Giancarlo Scoppettuolo (IT)
15.30 - 17.30	Workshop on starting a PICC team in your hospital Cost effectiveness of PICCs Why a PICC team Starting a PICC team in a European Country Starting and implementing a PICC team	Ton van Boxtel (NL) chair Kathy Kokotis (USA) Nancy Moureau (USA) Mauro Pittiruti (IT) Ton van Boxtel (NL) Lydia Cimpoeu (USA)

D204

12.30 - 14.00	Satellite symposium by Vidacare (invitation only) Intraosseous Vascular Access, Past, Present and Future Trends	vidacare Defining the Field of Intravenous Medicine® Lynn Phillips (USA)
14.15 - 15.30	Hands on workshop on PICC Insertion techniques Ultrasound guided venipuncture EKG guided positioning of the tip	Ton van Boxtel (NL) Ivano Migliorini (IT) Antonio LaGreca (IT) Davide Celentano (IT)
15.30 - 17.00	Hands on workshop on Nursing of PICC lines Dressing of the exit site Flushing and locking protocols	Sheila Inwood (GB) Carmel Streater (GB)

D301

14.00 - 17.30	Theoretic / practical course for physicians and nurses: Ultrasound guided venipuncture for peripheral venous access (additional fee)	Mauro Pittiruti (IT) Ivano Migliorini (IT) Daniele Biasucci (IT) Alessandro Mitidieri (IT)
---------------	---	---

ELICIUM 1 and EUROPAFOYER 1

10.00 - 17.30	Industrial exhibition and posters
17.30 - 19.30	Welcome Reception

Day 2: 17th June 2010, Thursday

ELICIUM 2

09.00 - 09.45	Introduction and Keynote Address	Dennis Maki (USA)
09.45 - 12.15	Consensus on prevention of catheter related infection: towards worldwide guidelines? Dennis Maki (USA) Giancarlo Scoppettuolo (IT) Walter Zingg (CH) Robert J. Pratt (GB) Emilio Bouza (ES) William Jarvis (USA)	Emilio Bouza (ES) chair
12.30 - 14.00	Satellite symposium by Bard (invitation only) Integrated Innovation—New Approaches to Vascular Access	 Andrew Johnston (GB) Sharon Armes (CAN) Ulf Teichgräber (GER) Massimo Lamperti (IT) chair
14.30 - 17.00	Ultrasound guided venipuncture: the new standard for central venous access? A worldwide consensus of experts Eric Desruennes (FR) Jack LeDonne (USA) Andrew Bodenham (GB) Mauro Pittiruti (IT) Thierry Pirotte (BE) Massimo Lamperti (IT) Susan Verghese (USA)	

D201-D202

09.00 - 12.15	What's new ?	Ihsan Inan (CH) chair
09.00 - 09.25	The expanding role of the nurse in choosing and inserting venous access devices	Michele di Giacomo (GB)
09.25 - 09.50	The EKG method for positioning the tip of the central venous catheters	Mauro Pittiruti (IT)
09.50 - 10.15	Dressing of the exit site: new technologies for infection prevention	Patrick Parks (USA)
10.15 - 10.40	New methods for securing the devices	Paul Blackburn (USA)
10.40 - 11.05	Preventing catheter-related thrombosis in 2010	Massimo Buononato (IT)
11.05 - 11.30	Current management of extravasation	Lisa Dougherty (GB)
11.30 - 12.15	Improving Safety: the End of Blind Sticking, Infraclavicular Access and Antimicrobial Coatings.	Jack LeDonne (USA)
12.30 - 14.00	Satellite symposium by 3M (invitation only) Getting to Zero CR-BSIs: Recent Successful Strategies	 Dennis Maki (USA) Hubert Ponssen (NL) Giancarlo Scoppettuolo (IT) Martin Stritesky (CZ) chair Timothy Royer (USA)
14.15 - 17.15	Risk Management in Venous Access: Abstract presentations	
14.15 - 14.35	Maintaining a zero central line associated blood stream infection rate for 17 months across a large and diverse adult patient population	Natascha Cuper (NL)
14.35 - 14.55	Visualizing veins with near-infrared light reduces unsuccessful attempts in blood withdrawal in children	Philippe Eggimann (CH)
14.55 - 15.15	Reduction of primary bacteremia following the introduction of chlorhexidine-impregnated sponges combined with transparent dressings on central venous catheters in a mixed ICU.	
15.15 - 15.35	Iv Cannulation- a focus on film dressings and reducing complications	Neville Hearse (AUS)
15.35 - 15.55	Venous International Classification: VIA Project: Study for the validation of a classification of the peripheral venous system with prognostic value and usefulness in patients under intravenous therapy	Julio Cesar De La Torre Montero (ES)
15.55 - 16.15	Impact of a peripheral intravenous cannulation team	Peter Carr (IRL)
16.15 - 16.35	Registered Professional Nurses Placing Central Vascular Access Catheters via the Internal Jugular Vein at the Bedside: One Year Evaluation of a Pilot Program	Gail Sansivero (USA)
16.35 - 16.55	The nursing role in central venous cannulation: implications for practice policy and research	Tim Spencer (AUS)
17.30 - 19.30	Satellite symposium by CareFusion (invitation only)	

Day 2: 17th June 2010, Thursday

Zero CRBSI - Can we do it? - Yes we can!

Robert Pratt (GB)
Stephen Webb (GB)
Nancy Moureau (USA)
Nik Gravenstein (USA)

D203

10.00 - 11.30	Workshop on venous access in neonates Venous access in neonates: current controversies EKG technique in neonates Infrared technology as an aid in venipuncture	Agnes vd Hoogen (NL) chair Thierry Pirotte (BE) Tannette Krediet (NL) Gregory Schears (USA)
11.30 - 12.15	Workshop on venous access in pediatrics How to minimize venous access – related complications in children PICCs, ultrasound guidance and the changing scene of venous access in pediatrics	Antonia Ithurralde (USA) Davide Vailati (IT)
14.15 - 17.00	Workshop on needle free connectors and the risk of infections	Giancarlo Scoppettuolo (IT) chair
14.15 - 15.15	Needlefree connection without infection... the in's and the out's!	Marcia Ryder (USA)
15.15 - 16.00	In vivo experience on needle free connectors	William Jarvis (USA)
16.00 - 17.00	Forum discussion	Giancarlo Scoppettuolo (IT) Emilio Bouza (ES)

D204

10.00 - 12.30	Workshop on catheter access in dialysis How to minimize catheter-related complications in dialysis access: a review of current guidelines	Jan Tordoir (NL) chair Frans Swiatek (DK) Carmelo Puliatti (GB) Jan Tordoir (NL)
14.15 - 15.30	Workshop on intraosseus access Indications, technique, complications	Michelle Fox (USA)
15.30 - 17.00	Workshop on safety Prevention policies for prevention of sharp injuries Review of current available safety needles and safety devices	Carmel Streater (UK) chair Andreas Wittmann (GER) Ron Stoker (USA)

D301

10.00 - 12.30	Theoretic / practical course for physicians and nurses: The EKG method for positioning the tip of central venous access (additional fee)	Mauro Pittiruti (IT) Antonio LaGreca (IT) Davide Celentano (IT)
14.00 - 17.30	Theoretic / practical course for physicians: Ultrasound guided venipuncture for central venous access (additional fee)	Antonio LaGreca (IT) Daniele Biasucci (IT) Alessandro Mitidieri (IT)

ELICIUM 1

10.00 - 17.30	Industrial exhibition
---------------	-----------------------

EUROPAFOYER 1

10.00 - 17.30	Industrial exhibition and posters
---------------	-----------------------------------

STRAND ZUID

17.30 - 19.30	Satellite symposium by Teleflex (invitation only) Vessel Health and Preservation: Risk Reduction Strategies Panel	 Nancy Moureau (USA) Marcia Ryder (USA) Sheila Inwood (GB) Jack LeDonne (USA) Mauro Pittiruti (IT) Giancarlo Scoppettuolo (IT) Tim Spencer (AUS)
19.30 - 23.30	Dutch evening (admission fee)	

Day 3: 18th June 2010, Friday

ELICIUM 2

09.00 - 10.30	Indications of ports	Ulf Teichgraber (GER)
09.00 - 09.25	All about ports: current indications for venous ports, arterial ports, spinal ports and peritoneal ports	Marguerite Stas (BE)
09.25 - 09.50	What is the best venous access in the oncologic patient? A review of the available guidelines	Roberto Biffi (IT)
09.50 - 10.15	The growing role of ports in pediatrics	Toan Khuc (BE)
10.15 - 10.25	Discussion	
10.25 - 12.15	Port implantation	Martin Stritesky (CZ) chair
10.25 - 10.50	Ultrasound guided venipuncture for port implantation: the new standard?	Eric Desruennes (FR)
10.50 - 11.15	Principles of intra cavity EKG	Johan Vijgen (BE)
11.15 - 11.40	Tip position while inserting venous ports: EKG guidance vs. fluoroscopy	Marguerite Stas (BE)
11.40 - 12.05	Nursing of the patient before and after port implantation	Jan Ouwerkerk (NL)
12.05 - 12.15	Discussion	
14.15 - 15.15	Power injectable ports	Eric Desruennes (FR) chair
14.15 - 14.35	The use of port in diagnostic radiology: advantages and risks	Ulf Teichgraber (GER)
14.35 - 14.55	Cost-effectiveness of power injectable ports	Paul Blackburn (USA)
15.15 - 16.15	Panel on port complications	Jan Ouwerkerk (NL) chair
15.15 - 15.35	The optimal treatment for port-associated venous thrombosis	Roberto Biffi (IT)
15.35 - 15.55	Mechanical complications of long term access: the role of the interventional radiologist	Ulf Teichgraber (GER)
15.55 - 16.15	Complications: the role of the Clinical Nurse Specialist	Godelieve Goossens (BE)
16.15 - 16.30	Closing session	

D201-D202

10.00 - 11.30	Controversies	Frans Swiatek (DK) chair
10.00 - 10.25	Heparin induced thrombocytopenia: implications for vascular access	Ted Warkentin (USA)
10.25 - 10.50	Catheter locking solutions: alternative to heparin	Lynn Hadaway (USA)
10.50 - 11.15	Positive pressure techniques for improving patency of totally implantable ports	Marie Cecile Douard (FR)
11.15 - 11.40	Catheter materials for ports: controversies	Ihsan Inan (CH)
11.40 - 12.05	Vesicant extravasations: frequency, mechanisms, pathogenesis, evidence-based management and continuing controversies	Irene Kriegel (FR)
14.15 - 16.00	Implanted Access Ports: Abstract presentations	Serban Bubenek (RO)
14.15 - 14.35	Harmonization of Port handlings : overview of a training kit	Christian Dupont (FR)
14.35 - 14.55	Wound healing and others complications following central venous placement in patients treated with Bevacizumab : a single-center, three year experience with a series of 336 patient	Irene Kriegel (FR)
14.55 - 15.15	Prospective clinical evaluation of a safety Huber needle in cancer patients	Martine Jérôme (BE)
15.15 - 15.35	Emotional problem in patients with totally implanted central venous access	Baudolino Mussa (IT)

D203

08.00 - 09.00	Satellite symposium by Vidacare (invitation only)	
	Intraosseous Vascular Access, Past, Present and Future Trends	Lynn Phillips (USA)
10.00 - 11.20	Abstract presentations	Paul Blackburn (USA)
10.00 - 10.20	Single-Center, five- year experience with 168 pleural implantable ports in the outpatient management of recurrent malignant pleural effusion	Irene Kriegel (FR)
10.20 - 10.40	Totally implantable venous access ports systems and risk factors of complications: a one year prospective study in a cancer centre: 815 new patient	Jean-Laurent Mehdi (MQ)

Day 3: 18th June 2010, Friday

10.40 - 11.00	An Observational Study of Clinical Outcomes with Double Lumen Central Venous Port Systems in Cancer Patients used for Concomitant Administration of Chemotherapy and Parenteral Nutrition	Sebastian Nagel (GER)
11.00 - 11.20	Prospective study on satisfaction and quality of life of oncological patients having benefitted of totally implantable venous access device placement	Gabriel Liberale (BE)
14.15 - 15.45	Workshop on venous access in parenteral nutrition Access for Parenteral Nutrition in Europe today Venous access in home parenteral nutrition: a review of current guidelines Venous access for intra-hospital parenteral nutrition	Michael Staun (DK) Susan Craig (IT) Tim Spencer (AUS)

D204

08.00 - 09.00	Satellite symposium by Luminetx (invitation only) Near Infrared: Taking Vascular Access to the Next Level	 Gregory Schears (USA) Josie Stone (USA)
10.00 - 11.40	Abstract presentations	
10.00 - 10.20	Brachial artery-jugular vein jump graft: A salvage procedure for vascular access	Ali Reza Kalantar Motamedi (IR)
10.20 - 10.40	Relationship Between Vessel Diameter and Time to Maturation of Arteriovenous Fistula for Hemodialysis Access	Morteza Khavanin Zadeh (IR)
10.40 - 11.00	Use of Tesio Catheters in infants and children receiving chronic hemodialysis	Carmine Pecoraro (IT)
11.00 - 11.20	Vascular Access Professional Organizations: A Multi-disciplinary Approach	Leigh Ann Bowe-Geddes (USA)
11.20 - 11.40	Guide-wired: an intranet-based guide to central venous catheter identification and care	Nina Scheppske (USA)
12.30 - 14.00	Satellite symposium by Perouse Medical (invitation only) Ultrasound guided venipuncture for port implantation	 Stéphane Villiers (FR)

D301

14.00 - 17.30	Theoretic / practical course for physicians: Ultrasound guided venipuncture for central venous access (additional fee)	Antonio LaGreca (IT) Massimo Lamperti (IT) Mauro Pittiruti (IT) Daniele Biasucci (IT)
---------------	---	--

ELICIUM 1

10.00 - 16.00	Industrial exhibition
---------------	-----------------------

EUROPAFOYER 1

10.00 - 16.00	Industrial exhibition and posters
---------------	-----------------------------------
